

Collaborative Visitor Use Management in the Sea to Sky

Ministry of
Forests, Lands, Natural
Resource Operations
and Rural Development

Recreation Trends

- Visitation to provincial parks & recreation areas is increasing exponentially,
- Significant increase in recreation & trail use during pandemic
- New recreation hot spots, increased dispersed vehicle camping
- Dramatic increase in traffic on resource roads while budgets decrease
- Record breaking Search & Rescue calls in 2020 (Squamish)
- 60% increase in Conservation Officer Service files in 2020

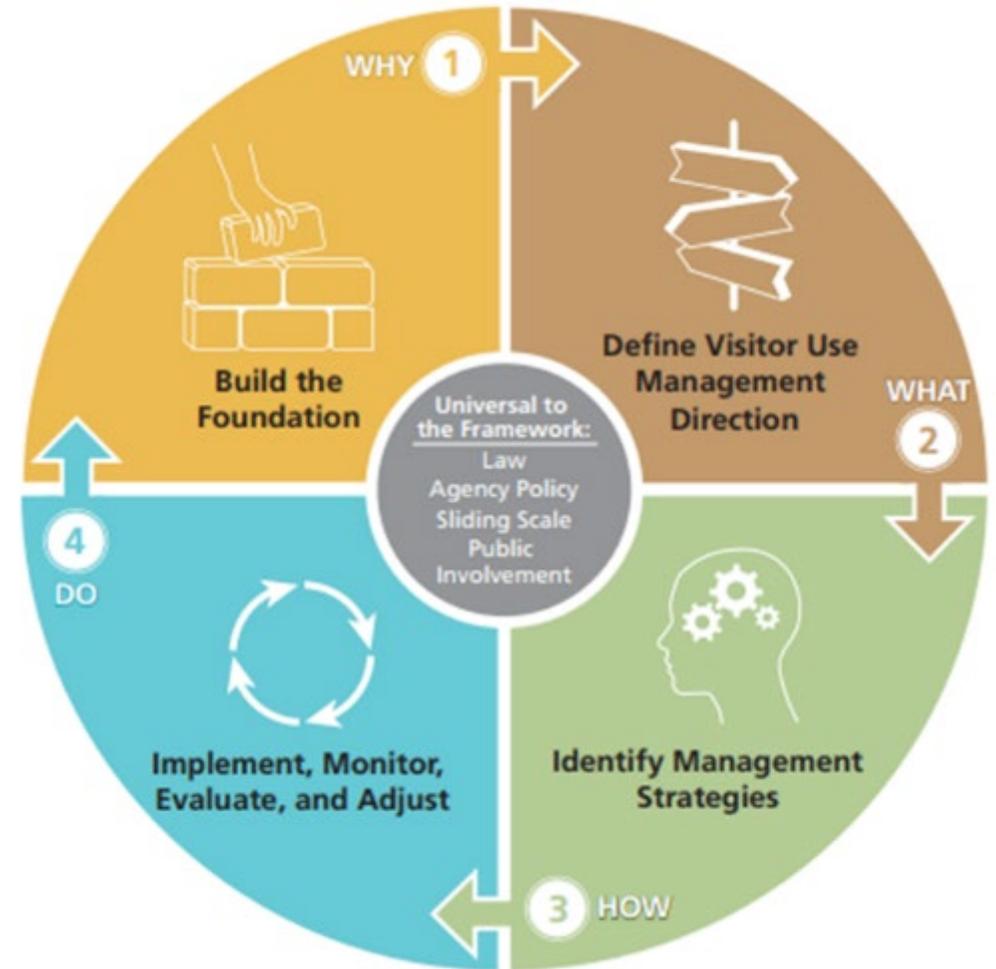

Trail location	Percent increase (Summer 2019 to Summer 2020)
Watersprite Lake	126%
Semaphore Lakes	101%
Brandywine Meadows	89%
Tenquille Lake	72%
Tricouni Meadows	64%

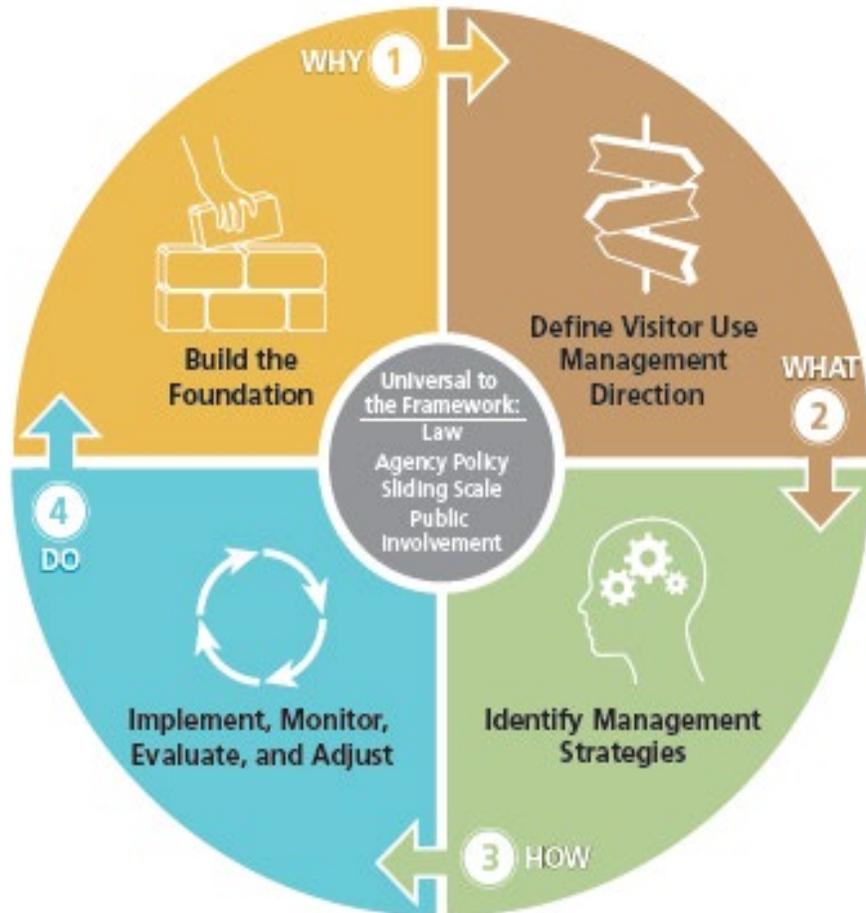

The Visitor Use Management Framework

- New approach
- Structured decision-making tool
- Carried out in partnership with First Nations
- Values based
- Collaborative
- Scalable
- Iterative

Visitor Use Management Framework

Element 1: Build the Foundation

Element 2: Define Visitor Use Management Direction

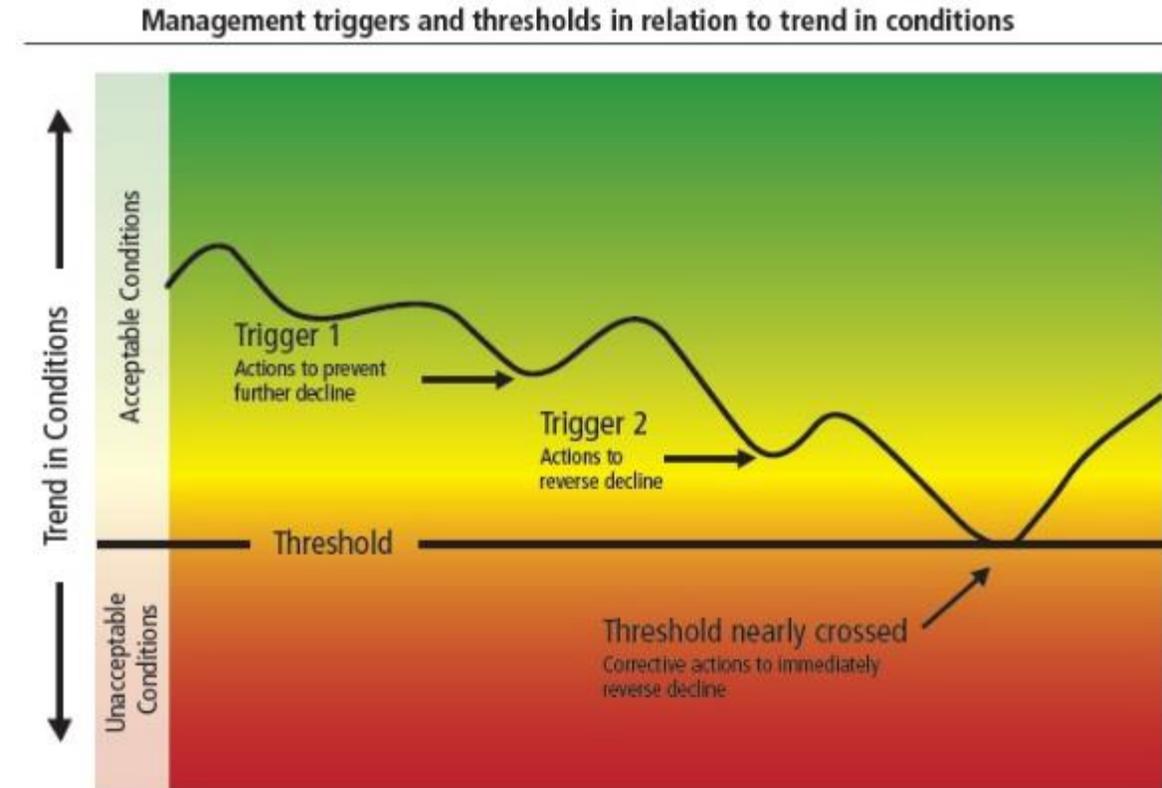

Element 3: Identify Management Strategies

Element 4: Implement, Monitor, Evaluate, and Adjust

Indicators & Monitoring

- **Indicators:** *Resource or experiential attributes that can be measured to track changes in conditions*
 - Connected to visitor use
 - Related to desired conditions
 - Sensitive to change
 - Reasonable / feasible
 - Reliable
- **Thresholds:** *Minimally acceptable conditions associated with each indicator*

Topic	Indicator	Threshold
Trail condition	Number of informal trails per mile of designated trail	No more than 1 informal trail leaving designated trail per 1-km segment
Trail condition	Linear extent of informal trails	No more than 10% increase in linear extent of informal trails in an area
Crowding	Number of people per viewscape	No more than 100 people at a specific location/viewscape
Wildlife	Number of heli-flight paths that cross goat ungulate winter range (UWR)	No more than 2 flights per season crossing UWR
Campsite condition	Amount of vegetation loss at campsite	No more than 25m ²

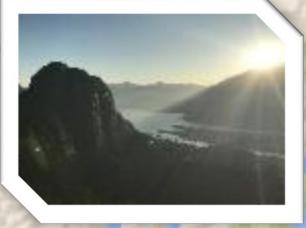

Meager Creek & Keyhole Hot Springs

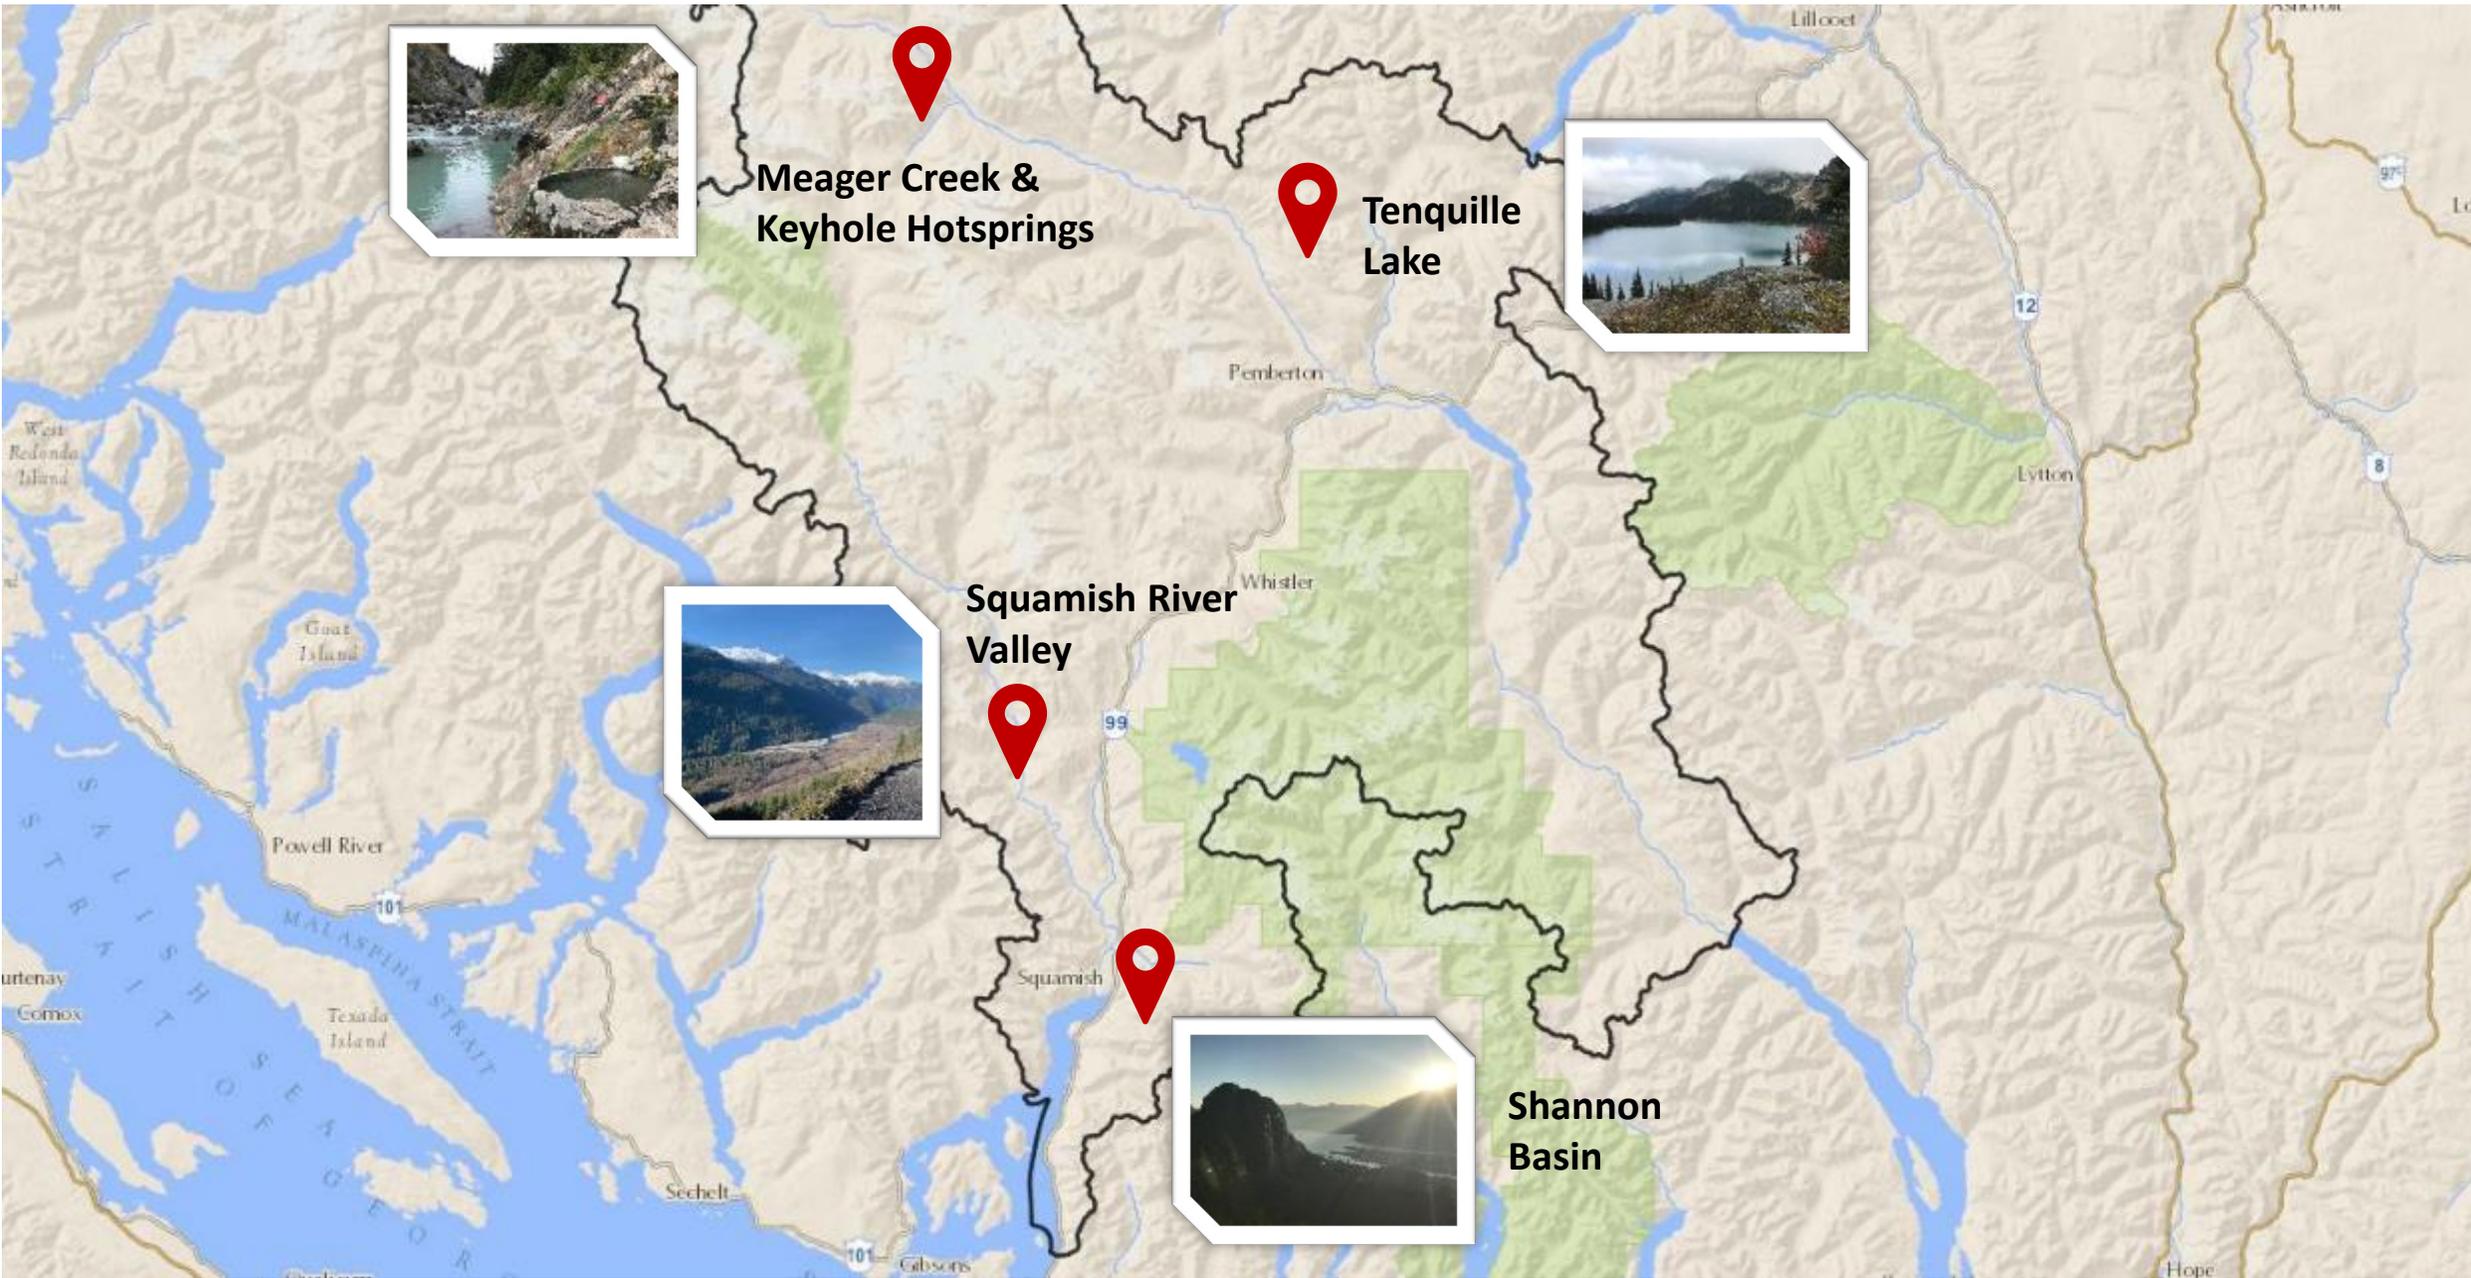

Tenquille Lake

Squamish River Valley

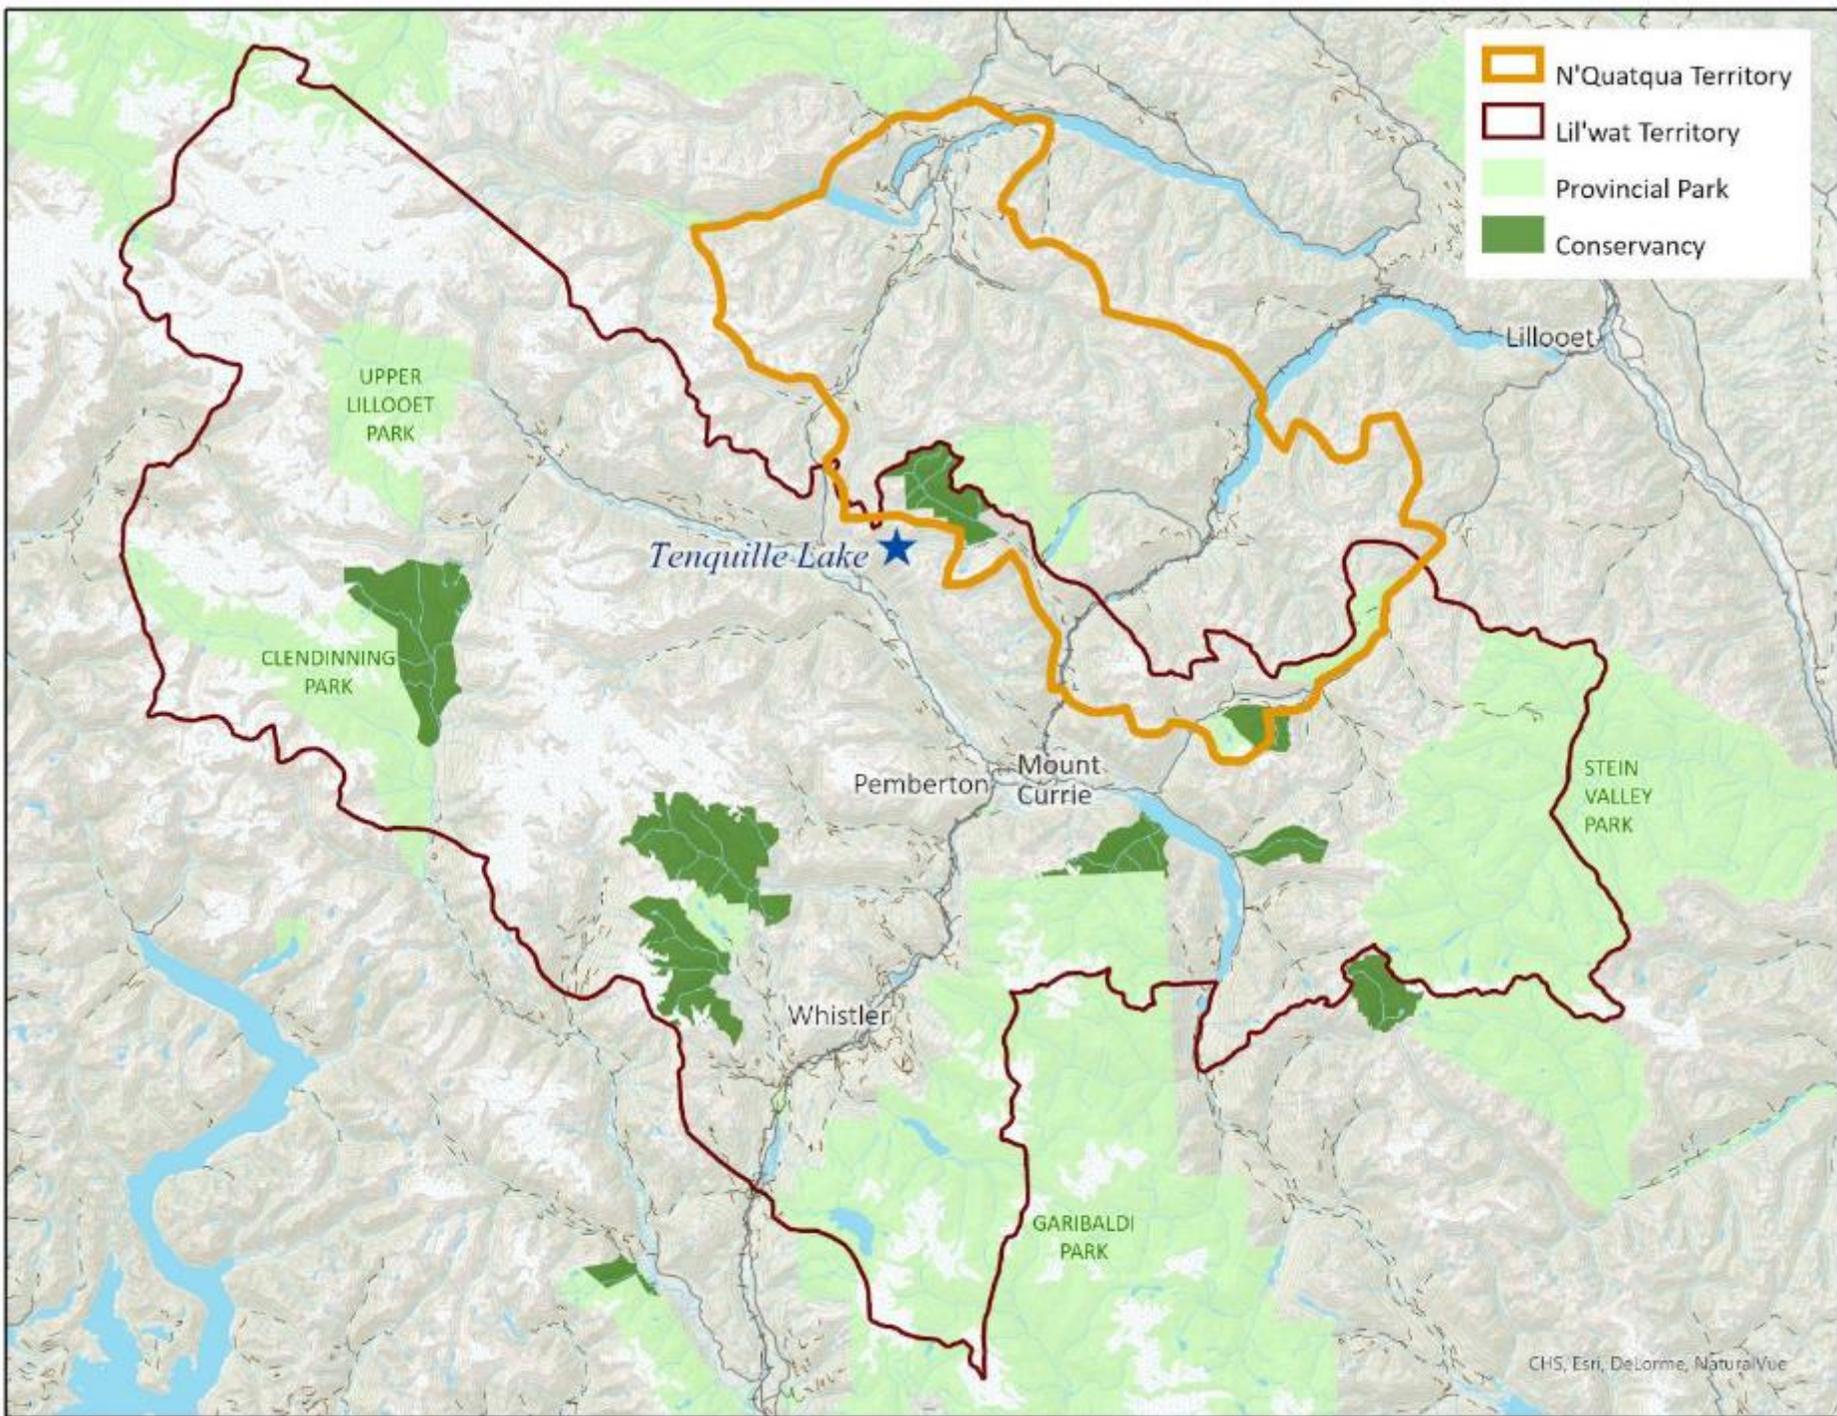

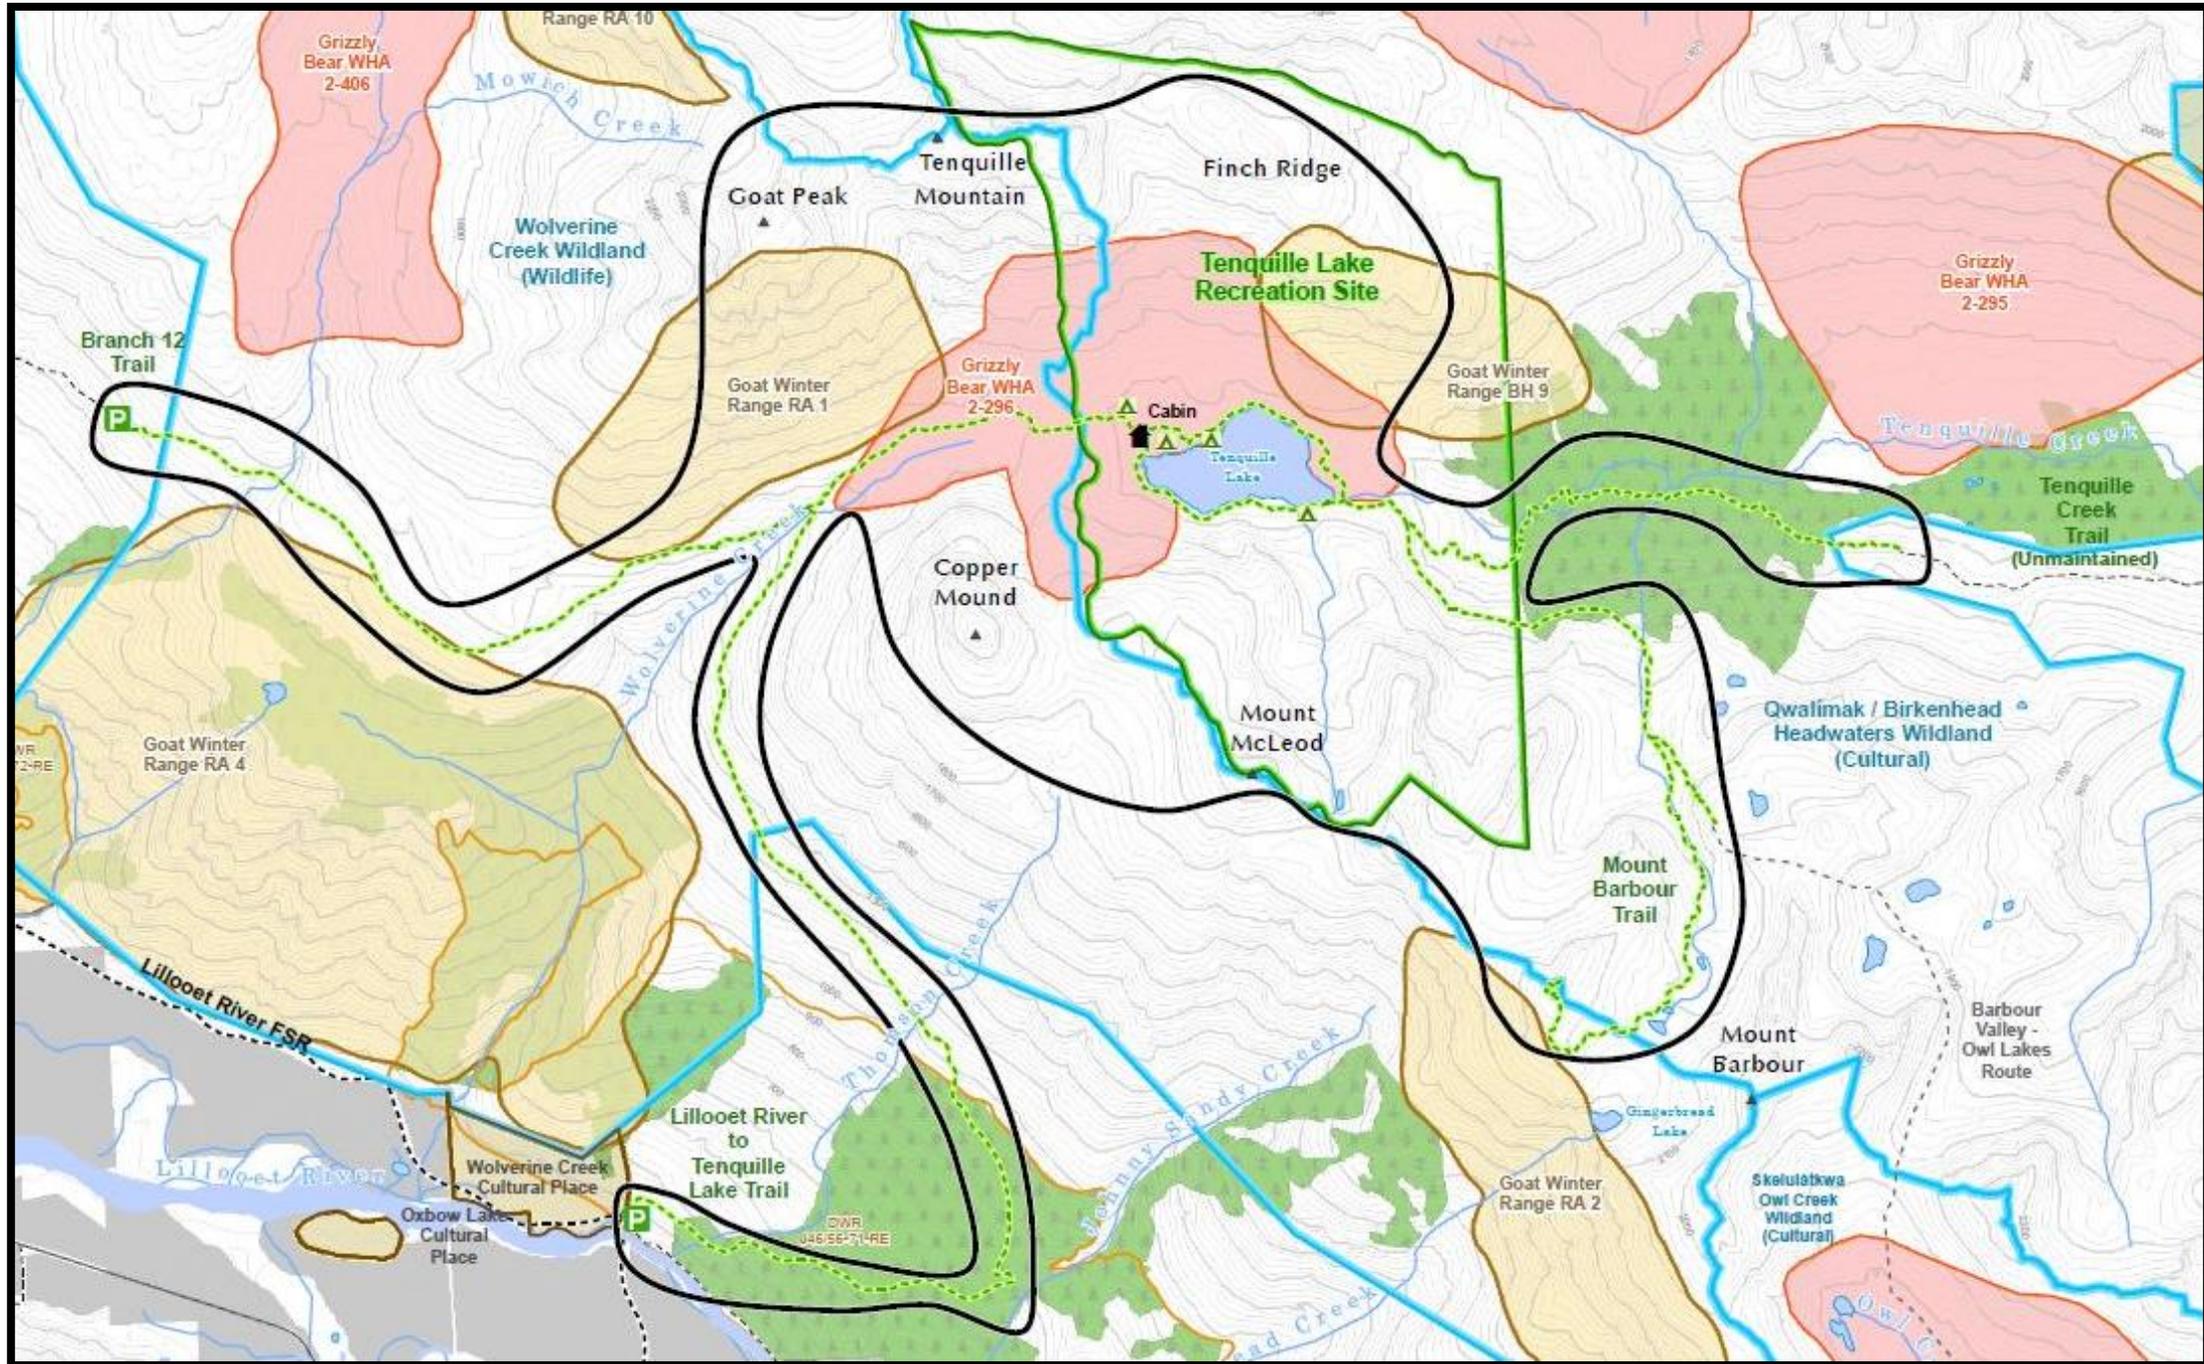

Shannon Basin

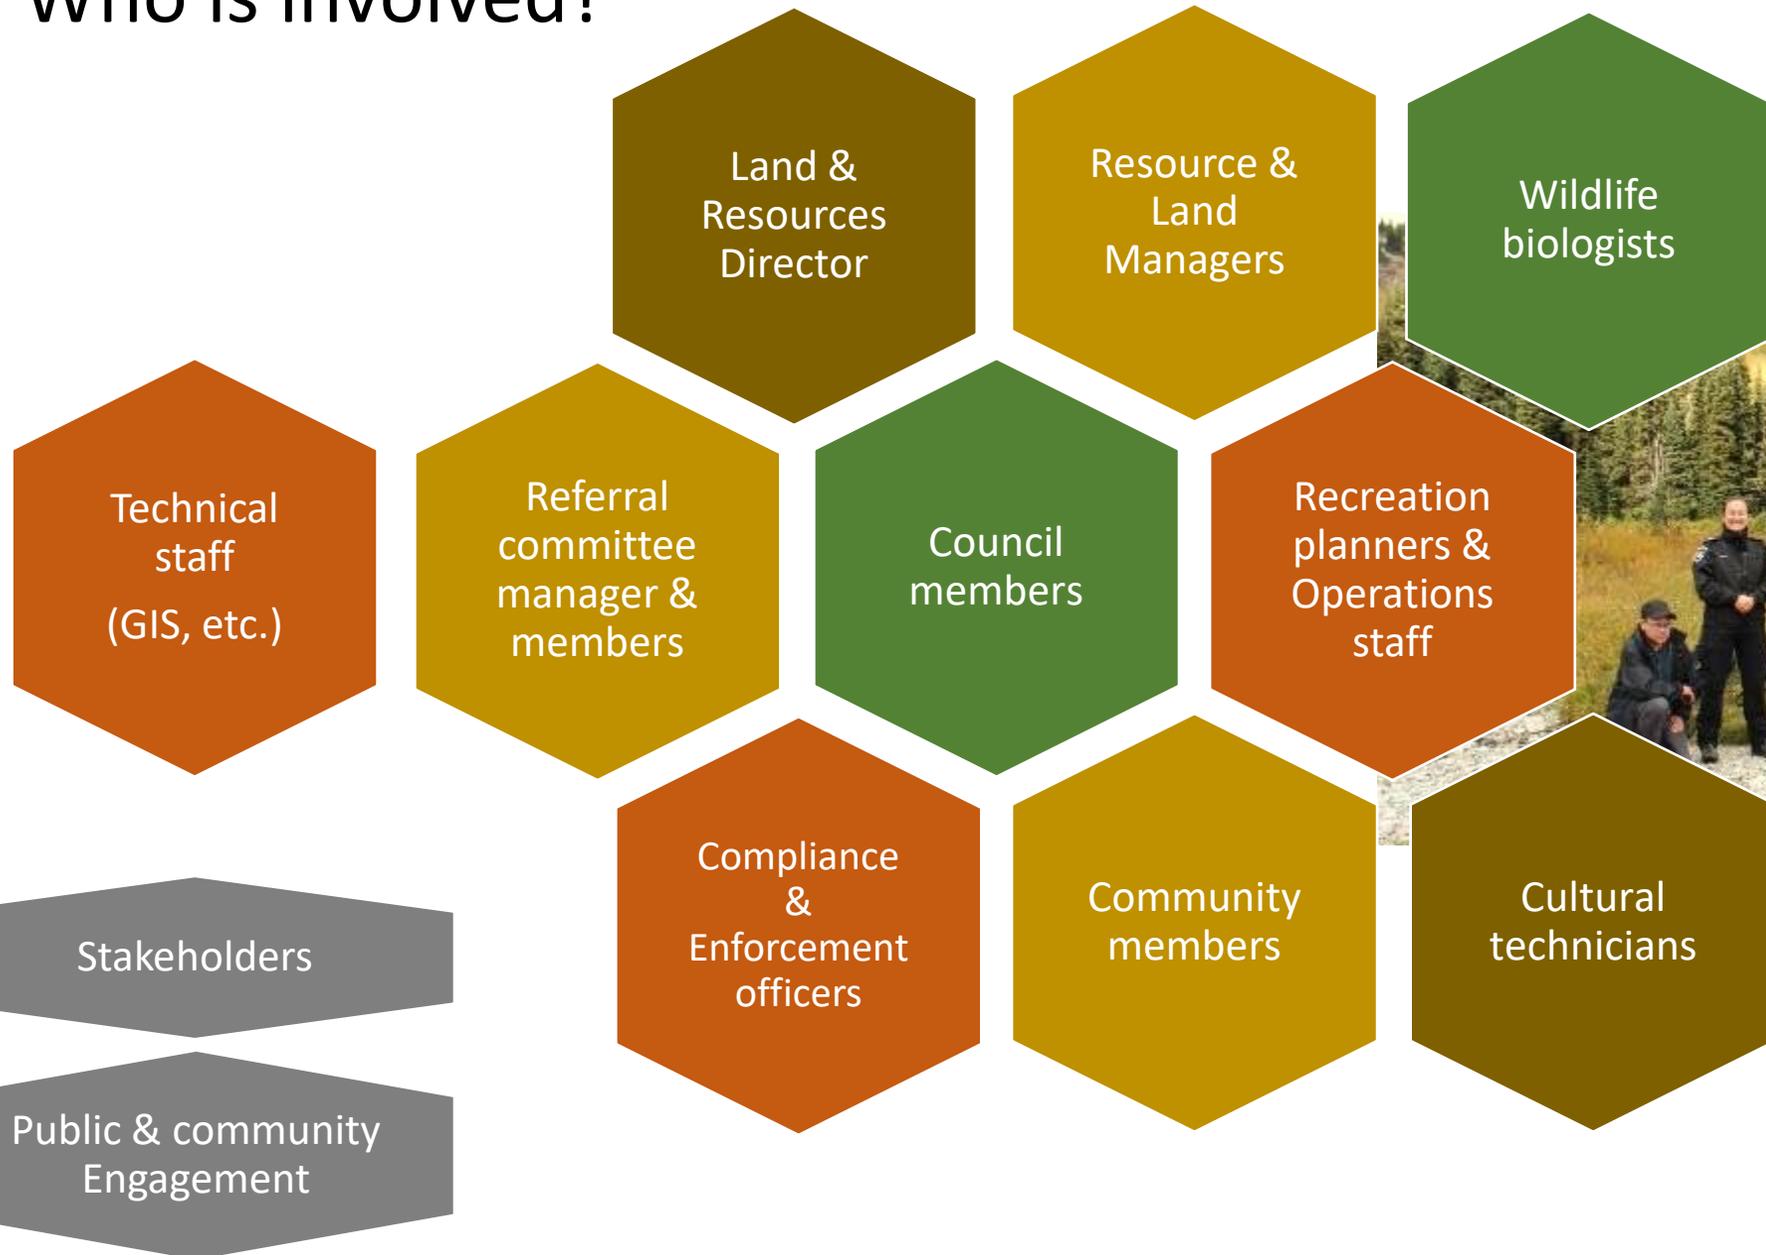

Case Study: Tenquille Lake

Who is involved?

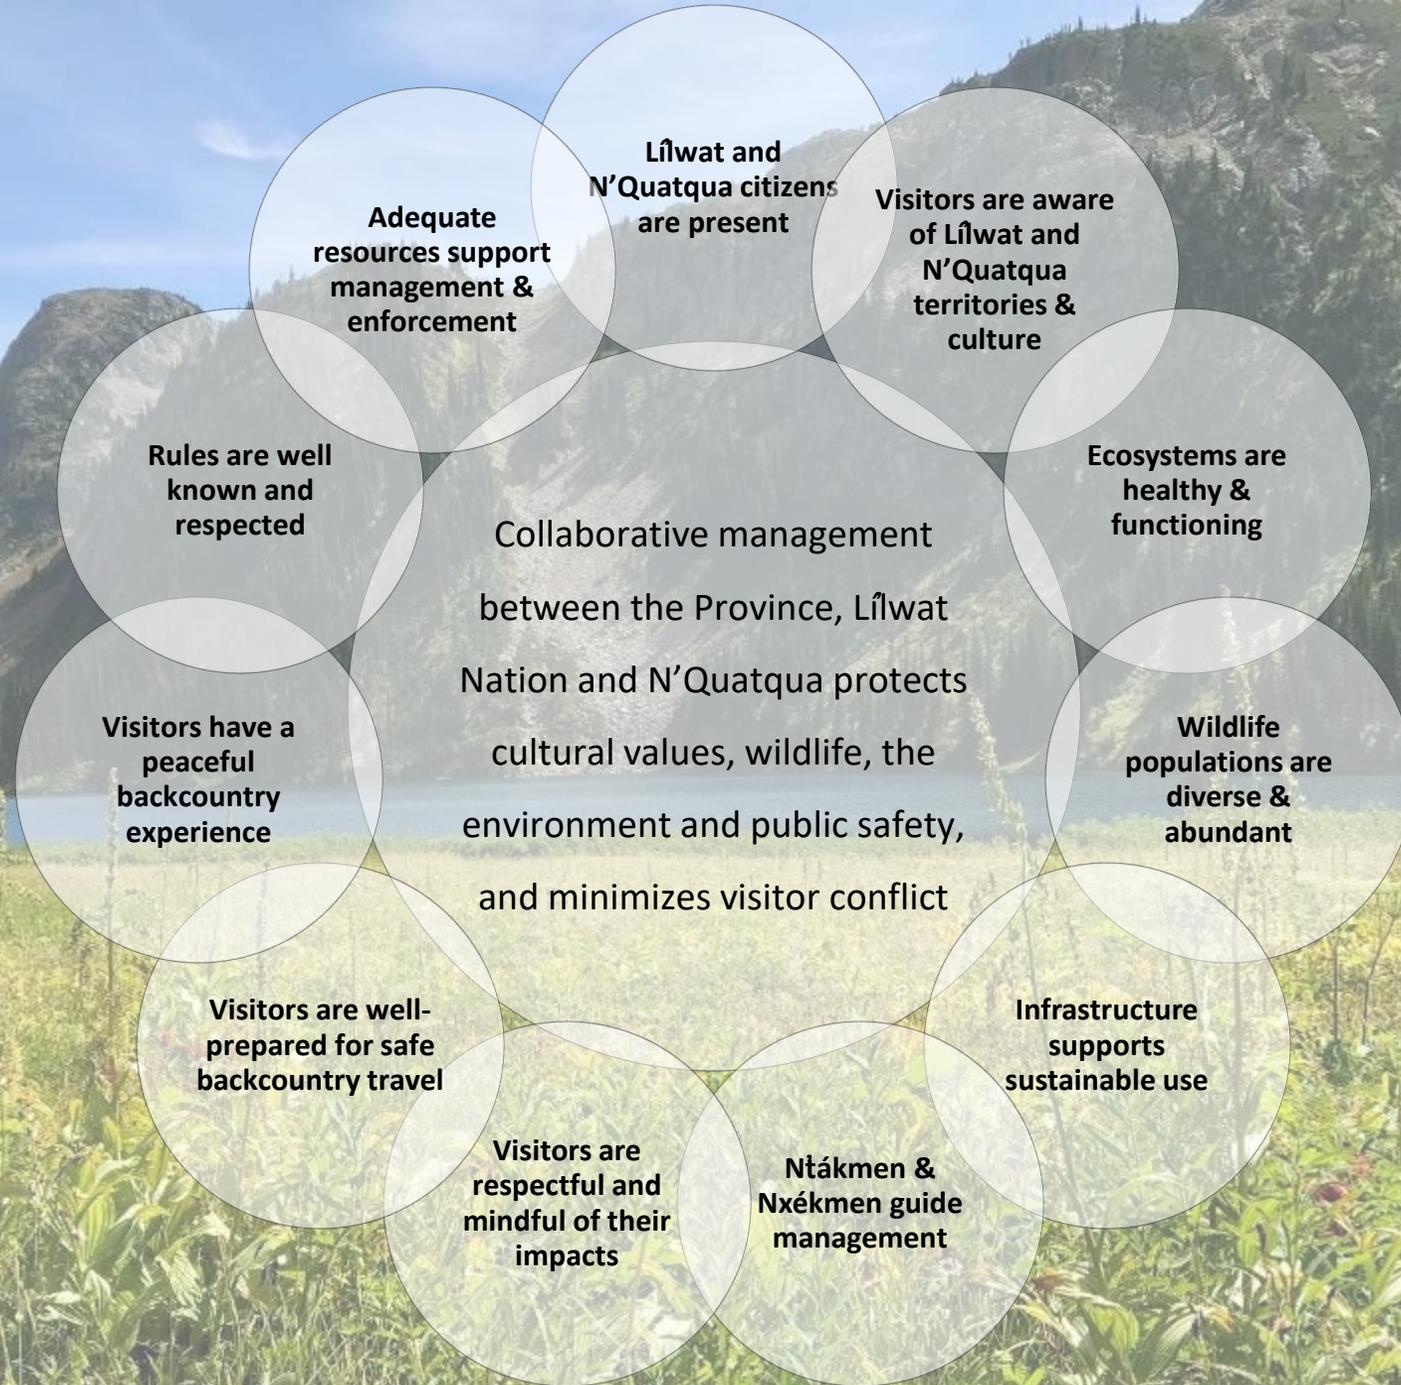

Values

Lil'wat & N'Quatqua history, connection to land	Lilw'at & N'Quatqua traditional use activities	Hunting ground	Gathering area (berries, mushrooms, medicinal plants)	Cultural heritage sites
Spiritual importance	Linkage between Lillooet & Birkenhead Rivers	Natural beauty	Wildlife habitat	Wildlife diversity
Ecosystem diversity	Recreation values (diverse)	Recreation infrastructure	Partnerships (PWA)	Accessibility

Concerns/ Issues

- Effective loss of access for Lil'wat & N'Quatqua
- Managing growth in visitation
- Impacts to wildlife from recreation
- Potential for increased human-wildlife conflict with increasing visitation
- Disrespectful visitor behavior
- Risk of wildfire
- Need for more management presence & education
- Need for sustainable funding to support infrastructure, education, management & enforcement

Vision

Management Actions (3 E's)

- Education & Signage
- Designated campsites
 - Rehab social sites
- Reservation System (cabin/campground)
 - Fee for service
 - Site operator
- Regulations
 - i.e. no biking, dogs, snowmobiles, fires
- Lil'wat skél7awlh (stewards)

Monitoring

- Visitor use
- Vegetation recovery in non-designated camping areas
- Wildlife
- Invasive species
- Compliance

Positive Outcomes

- VUM Strategies for Meager & Keyhole Hotsprings & Tenquille Lake
- Stronger relationships with First Nations
- Opportunities for co-management
- Support from stakeholders – shared values
